

NIKOLAS J. ZEINER

Chandler, AZ | (480) 528-0857 | nzeiner@gmail.com | nikolaszeiner.github.io/NikolasZeiner

SUMMARY

Business analytics graduate (M.S. and B.S.) with internship experience at Honeywell Aerospace and Leslie's, building dashboards, writing SQL, and turning data into plain-language recommendations for leadership. Recently built a paginated project controls report on SQL Server tracking earned value and supplier risk for a simulated construction project. Reliable, detail-oriented, and open to analyst, operations, reporting, and other roles where I can contribute right away.

TECHNICAL COMPETENCIES

Business Intelligence: Power BI (DAX), Tableau, dashboard design and standardization, KPI definition, recurring reporting

Data & Querying: SQL (large relational databases), SAP data extraction, ETL and data transformation, Access, Excel

Programming & Analysis: Python, R (regression modeling), Monte Carlo simulation, trend and anomaly analysis

Data Governance: Data validation, reconciliation against source systems, process documentation, regulated environments

PROFESSIONAL EXPERIENCE

Engineer Program Management Intern | Honeywell Aerospace, Phoenix, AZ June – September 2025

- Wrote and executed SQL queries to extract and validate data from SAP against source systems, delivering Tableau dashboards and automated reports for cross-functional engineering, operations, and automation teams.
- Partnered with the EDM Automation team to modernize and standardize dashboards organization-wide, improving data accuracy, usability, and performance while reducing manual reporting effort.
- Validated the accuracy and integrity of report outputs before distribution and documented processes and procedures to support consistency and knowledge transfer in a highly regulated environment.

Retail Operations Intern | Leslie's Pools, Phoenix, AZ Summer 2024

- Built and maintained a recurring Power BI dashboard tracking fulfillment rate, foot traffic, and sales, pairing every refresh with plain-language commentary so leadership could act on trends quickly.
- Collaborated with district managers across 950+ store locations to understand reporting requirements and align a multi-site operation on a single, standardized reporting structure.
- Wrote SQL queries and Excel-based analyses in partnership with the data engineering team, reviewing outputs for accuracy and documenting query and refresh procedures.

PORTFOLIO PROJECTS

Construction Project Controls Report | SQL Server, Power BI Report Builder (simulated dataset)

- Built a paginated weekly project controls report in Power BI Report Builder on SQL Server views for a simulated semiconductor fab construction project, with parameters, area-level page breaks, and conditional formatting.
- Identified a \$4.6M projected overrun (CPI 0.87) in one area and \$4.3M in at-risk orders from a supplier with a 94% on-time record, and recommended escalating four overdue purchase orders.

Supply Chain Performance & Inventory Risk | Python, SQL, Power BI, Access (simulated dataset)

- Reconciled and analyzed 1,000 purchase orders across 5 suppliers and 5 warehouses using Python and SQL, surfacing a supplier with a 49.3% on-time rate and \$3.1M in spend at risk (50.2% of total spend).
- Delivered a 2-page Power BI dashboard with heat maps of supplier reliability, built relational tables in Microsoft Access to unify supplier, order, and warehouse data, and documented the refresh workflow.

EDUCATION & CERTIFICATIONS

Grand Canyon University, Colangelo College of Business

M.S. in Business Analytics | B.S. in Business Analytics, Minor in Accounting

In progress: Microsoft PL-300 (Power BI Data Analyst), Databricks, PCAP (Python)

OTHER EXPERIENCE

Volleyball Coach | Corona del Sol High School, Tempe, AZ. Led and developed high school athletes Jan 2020 – Nov 2025

Landscaping | BV Lawn Care, Phoenix, AZ. Ongoing detail-oriented grounds maintenance work Jan 2022 – Present

Outside Service | Raven Golf Club & Ken McDonald Golf Course. Client-facing service role 2020 – 2022
