Education

Grand Canyon University, Colangelo College of Business

Master of Science in Business Analytics, 2025 / GPA: 3.31

Bachelor of Science in Business Analytics, Minor in Accounting, 2023 / GPA: 3.26

Projects

Capstone Project: Tool Rental SLA & Inventory Analytics (2025)

- Developed predictive models using Logistic Regression, Random Forest, and Gradient Boosting in R to forecast SLA breaches, tool losses, and unserviceability rates
- Applied cross-validation and cost-sensitive evaluation metrics to prioritize high-impact operational risks.
- Designed and deployed a Power BI dashboard integrating Monte Carlo simulations with real inventory data to provide executive KPIs such as SLA compliance %, turnaround time distributions, and category-level inventory insights for proactive resource planning.
- Drafted detailed pseudo-requirements for sales tracking tools through stakeholder feedback to simulate real-world requirements gathering processes.

Professional Experience

Honeywell Aerospace – Engineer Program Management Intern

Phoenix, AZ | June – September 2025

- Collaborated with cross-functional engineering, operations, and automation teams to document and refine user requirements.
- Successfully translated business needs into Tableau dashboards and automated reports that enhanced visibility and decision-making for aerospace engineering operations.
- Partnered with the EDM Automation team to modernize and standardize existing dashboards organization-wide to improve data accuracy, usability, and scalability for engineering program management resulting in more efficient workflows and reduced manual reporting efforts.
- Supported program management initiatives by developing analytics solutions aligned with aerospace industry standards for reliability, compliance, and performance tracking which directly contributed to operational excellence in a highly regulated environment.

Leslie's Pools – Retail Operations Intern

Summer 2024

- Conducted stakeholder interviews with district managers to identify operational performance gaps and reporting needs across 950+ store locations.
- Designed and implemented a Power BI scorecard dashboard aligned with key business metrics like fulfillment rate, foot traffic, and sales which significantly increased data visibility and enabled leadership to make faster, more informed operational decisions.
- Partnered with the data engineering team to design and build SQL queries for extracting and transforming operational data across 950+ store locations, enabling accurate, scalable datasets that served as the foundation for Power BI scorecards and performance reporting.
- Built Excel-based dashboards with advanced functions (VLOOKUP, XLOOKUP, PivotTables) to track field engagement metrics, empowering leadership to optimize store visit frequency, quality, and resource allocation.

Technical Competencies: Advanced Excel, Power BI, SQL, Tableau, Python, and R Studio
