Education

Grand Canyon University, Colangelo College of Business

Master of Science in Business Analytics, 2025 / GPA: 3.31

Bachelor of Science in Business Analytics, Minor in Accounting, 2023 / GPA: 3.26

Projects

NBA Salary & Performance Analysis (Personal Project, 2023-24 Season Data)

- Built an end-to-end player-value analysis pipeline across Python, SQL, R, Power BI, and Excel, evaluating salary efficiency for every NBA player against on-court performance
- Cleaned and engineered value metrics in Python (Jupyter), wrote 5 analytical SQL queries (team payroll, position summaries, overpaid-player detection), and built ggplot2 visualizations in R to correlate salary with points, position, and value score
- Delivered a 3-page interactive Power BI dashboard and a 6-sheet Excel workbook with PivotTables, translating raw stats into team- and player-level insights
- Surfaced concrete findings — including the league's worst value contract (a \$47M player with minimal playing time) and identifying Point Guards as the highest-paid position on average

Phoenix Metro Real Estate Analysis (Personal Project)

- Built a regression model in R and an interactive Tableau dashboard analyzing 5,000 home sales across 12 Phoenix Metro neighborhoods to identify pricing trends, market gaps, and days-on-market patterns
- Surfaced a 3.5x price gap between neighborhoods (Paradise Valley at \$1.2M median vs. Avondale at \$340K) and identified a strong positive correlation between square footage and sale price

Professional Experience

Honeywell Aerospace – Engineer Program Management Intern Phoenix, AZ | June – September 2025

- Collaborated with cross-functional engineering, operations, and automation teams to document and refine user requirements, translating business needs into Tableau dashboards and automated reports that enhanced visibility and decision-making
- Partnered with the EDM Automation team to modernize and standardize dashboards organization-wide, improving data accuracy, usability, and scalability while reducing manual reporting efforts
- Developed analytics solutions aligned with aerospace industry standards for reliability, compliance, and performance tracking, contributing to operational excellence in a highly regulated environment

Leslie's Pools – Retail Operations Intern | Summer 2024

- Conducted stakeholder interviews with district managers to identify operational performance gaps and reporting needs across 950+ store locations.
- Designed and implemented a Power BI scorecard dashboard tracking fulfillment rate, foot traffic, and sales, increasing data visibility and enabling faster, more informed leadership decisions
- Partnered with the data engineering team to build SQL queries and Excel dashboards (VLOOKUP, XLOOKUP, PivotTables) that fed the scorecards and tracked field engagement metrics

Technical Competencies: Advanced Excel, Power BI, SQL, Tableau, Python, and R Studio
